CAREER OBJECTIVE

Motivated BCA student with a strong foundation in Machine Learning, Data Science, Artificial Intelligence, Computer Vision, and Software Development. Experienced in developing AI-powered applications, image classification systems, NLP chatbots, and object detection models through academic projects and industry internship experience. Seeking opportunities as a Data Scientist, Machine Learning Engineer, Python Developer, Data Analyst, Prompt Engineer, or Software Engineer to apply technical skills and contribute to innovative solutions.

EDUCATION

Bachelor of Computer Applications (BCA)

St. Thomas College, Thavalappara, Konni
Mahatma Gandhi University, Kottayam
2024 – 2028

Higher Secondary Education (CBSE)

Holy Angels Model School, Pathanamthitta
Year of Passing: 2024

INTERNSHIP EXPERIENCE

Machine Learning Intern | NEXT GEN PRO

April 2026 – June 2026

- Worked on Machine Learning models using Python.
- Performed data preprocessing and feature engineering on datasets.
- Built classification models using Random Forest and Support Vector Machine (SVM).
- Applied machine learning concepts to real-world business datasets.
- Improved understanding of model evaluation and prediction techniques.
- Collaborated with mentors and peers on AI and Data Science projects.

TECHNICAL SKILLS

Programming Languages

- Python
- Java
- C
- SQL

Machine Learning & AI

- Supervised Learning
- Random Forest
- Support Vector Machine (SVM)
- K-Nearest Neighbors (KNN)
- Decision Trees
- Logistic Regression
- Deep Learning
- Computer Vision
- Natural Language Processing (NLP)

Libraries & Frameworks

- Scikit-Learn
- TensorFlow
- PyTorch
- OpenCV
- NLTK
- Pandas
- NumPy
- Streamlit

Tools & Platforms

- Google Colab
- Git
- GitHub
- SQLite
- YOLOv8
- Three.js

PROJECTS

Catty – Multimodal AI Assistant

Technologies: Streamlit, Gemini 2.5 Flash, YOLOv8, OpenCV, PyTorch, SQLite, SpeechRecognition

- Developed a browser-based multimodal AI assistant supporting text, image, and voice interactions.
- Integrated Google Gemini for conversational AI capabilities.
- Implemented real-time object detection using YOLOv8.
- Added image quality analysis using OpenCV.
- Enabled Visual Question Answering using Salesforce BLIP.
- Designed a modern glassmorphism-based user interface with Three.js animations.
- Implemented multi-session chat history management using SQLite.
- Link-<https://github.com/whitenight-36/catty-chatbot>

Vehicle Detection System

Technologies: Python, YOLO, PyTorch, Google Colab

- Developed a real-time vehicle detection system using YOLO object detection.
- Trained and evaluated models using traffic datasets.
- Achieved accurate vehicle identification in images and video streams.
- Link-<https://github.com/whitenight-36/vehical-detection>

Animal Classification System

Technologies: Python, TensorFlow, CNN, Deep Learning

- Built an image classification model using Convolutional Neural Networks.
- Classified multiple animal species from uploaded images.
- Performed preprocessing, training, and model evaluation.
- Link<https://github.com/whitenight-36/animal-classification>

Simple Medical Chatbot

Technologies: Python, NLP, NLTK, Scikit-Learn, Pandas, NumPy

- Developed an NLP-based chatbot to answer common healthcare-related queries.
- Implemented text preprocessing and intent recognition techniques.
- Improved user experience through automated conversational responses.
- Link-<https://github.com/whitenight-36/simple-chatbot>

Face Detection System

Technologies: Python, OpenCV, Haar Cascade, NumPy

- Developed a real-time face detection application.
- Implemented face tracking in video streams.
- Applied image processing techniques for accurate detection.
- Link-<https://github.com/whitenight-36/face>

CERTIFICATIONS

Artificial Intelligence Certification

Duration: 6 Months Year: 2024

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Communication
- Leadership
- Time Management
- Critical Thinking
- Adaptability

LANGUAGES

- English
- Malayalam
- Hindi
- Tamil (Basic)
